Science Item Sampler
Grade HS

ITEM SAMPLERS ARE NOT SECURE TEST MATERIALS. THIS ITEM SAMPLER TEST BOOK MAY BE COPIED OR DUPLICATED.

Science Test

General Directions

- This test contains two segments.
- You may write in this test book or use scratch paper.
- All answers must be marked in this test book.
- This test has four kinds of questions.
- Answer each multiple-choice question by circling your answer. The sample below shows how to do this.

Sample Question Answered in Test Book:

What should a farmer do to prevent too much fertilizer from being put on a field?

- A.** Apply fertilizer right before planting
- B.** Apply fertilizer and water at the same time
- C.** Measure the amount of minerals the soil needs
- D.** Measure the amount of water in the soil

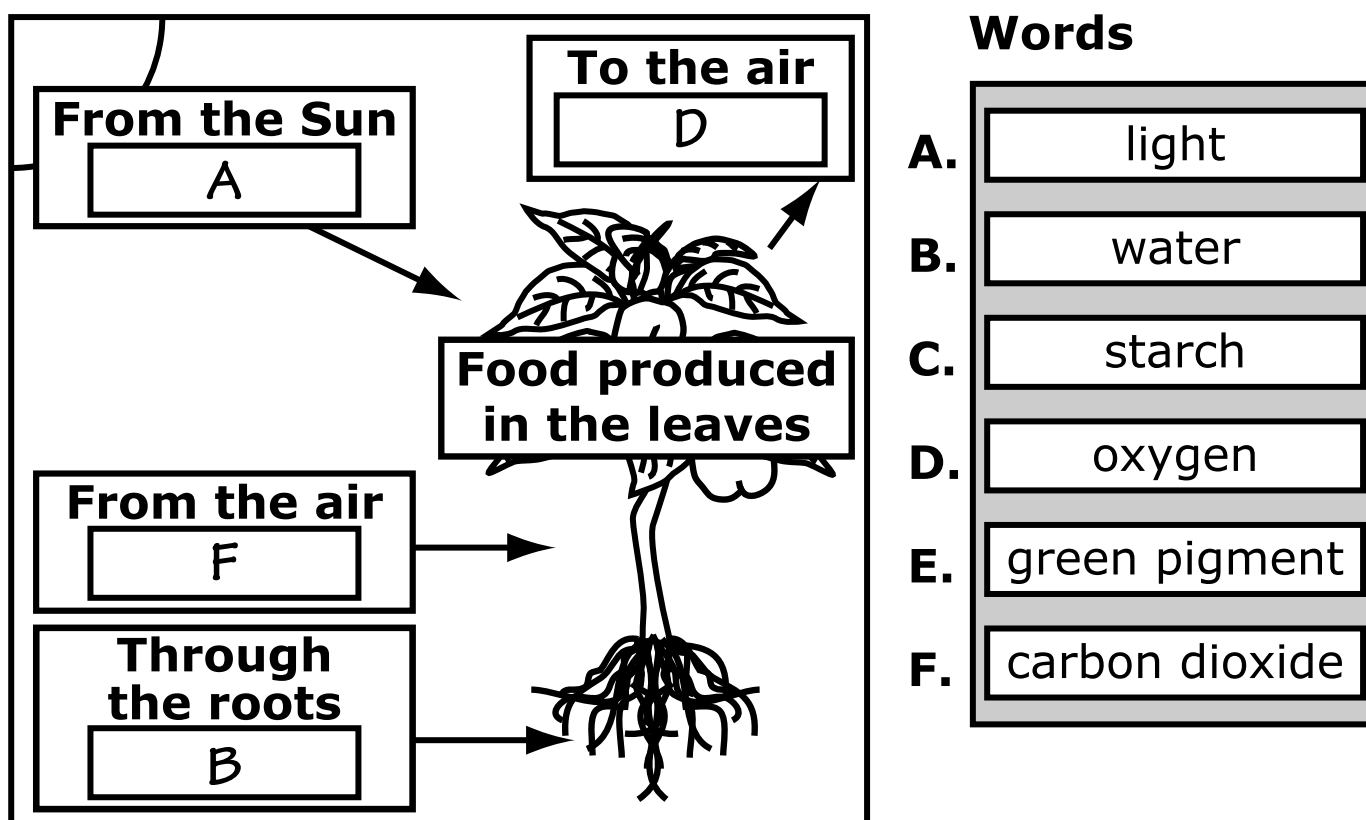

Go on to the next page.

- For some diagram questions, you will need to write the label letters (A, B, C, etc.) in the boxes. The sample below shows how to do this.

Sample Question Answered in Test Book:

This diagram shows the process of photosynthesis. Identify the parts of the photosynthesis process involved in this ecosystem.

Each word is labeled A, B, C, D, E, or F. Write the letter of the correct word in each empty box. Four of the words will be used.

Go on to the next page.

- For some diagram questions, you will need to circle the word you want to select as your answer. The samples below show how to do this.

Sample Question Answered in Test Book:

Two characteristics of pintail ducks are listed. Identify the characteristics that are the same and different in pintail ducks.

On the diagram, circle the word you want to select. You may only circle 1 word for Same and 1 word for Different.

Same	Different
<input type="text"/>	<input type="text"/>
Body size	Body size
Number of legs	Number of legs

Sample Question Answered in Test Book:

Choose 2 different adaptations that make this duck more suited to feed on water plants than other kinds of birds.

On the diagram, circle the 2 adaptations. You may only circle 2 adaptations.

Go on to the next page.

- For some graphing equations, you will need to write a “+” above each bar, where the top of the bar should be. The sample below shows how to do this.

Sample Question Answered in Test Book:

Read the water level in the beakers. Make a graph of this data.

Write a “+” above each bar where the top of the bar should be.

Beaker	Amount of Water (mL)
Ice Only	20
Ice and Salt	30

- When you finish a segment of the test, stop and check your answers. Then use the sticker given to you to seal it. Once you seal a segment, you cannot go back to it. Each segment must be sealed before you move on to the next segment.

There is no test material on this page.

Go on to the next page. 

On this test, do your own best work to show what you know and can do.

- Do not accept help finding answers to test questions.
- Do not give answers to other students.
- Do not tell others what is on the test.
- There may be consequences if you do not follow directions or if you behave dishonestly.

Segment 1

You will be told when to begin this segment.

There is no test material on this page.

Go on to the next page.

Cyanobacteria

**ITEM SAMPLER.
MAY BE DUPLICATED.**

Go on to the next page. 

1

Cyanobacteria are aquatic bacteria with many unique characteristics. Cyanobacteria are single-celled, but sometimes they live in multicellular colonies or chains. The diagram shows cyanobacteria chains.

**ITEM SAMPLER.
MAY BE DUPLICATED.**

Go on to the next page.

- 1.** Genetic material in bacteria is organized differently than genetic material in plant and animal cells. Identify the correct genetic material for each cell.

Each genetic material is labeled A or B. Write the letter of the correct genetic material in each empty box. You may use each letter more than once.

 Bacterial cell	
 Plant cell	
 Animal cell	

A.	 1 circular chromosome
B.	 Chromosomes inside a nucleus

**ITEM SAMPLER.
MAY BE DUPLICATED.**

Go on to the next page.

2. Cyanobacteria cell membranes are selectively permeable. Cells use many methods of transport to move materials into and out of the cells. Label each method of material transport in the diagram.

Each method of material transport is labeled A, B, or C. Write the letter of the correct method of material transport in each empty box.

Labels

A.

osmosis

B.

facilitated transport

C.

active transport

There is no test material on this page.

Go on to the next page. 

Unlike most kinds of bacteria, cyanobacteria contain chlorophyll and perform photosynthesis. Because they contain chlorophyll, most cyanobacteria are green.

**ITEM SAMPLER.
MAY BE DUPLICATED.**

Go on to the next page.

3. Identify 3 objects involved in photosynthesis.

Each object is labeled A, B, C, D, E, or F. Write the letter of the correct object in each empty box in the diagram. Three of the objects will be used.

Objects

A.	B.	C.
 Water (H₂O)	 Carbon dioxide (CO₂)	 Oxygen (O₂)
D.	E.	F.
 Glucose (C₆H₁₂O₆)	 Sunlight	 Heat

**ITEM SAMPLER.
MAY BE DUPLICATED.**

Go on to the next page.

Some cyanobacteria change nitrogen gas in the air to a usable form. These cyanobacteria are nitrogen fixers and important components of the nitrogen cycle. The diagram shows part of the nitrogen cycle in an aquatic environment.

4. How are cyanobacteria important to aquatic plants in the nitrogen cycle?
- A. Aquatic plants use cyanobacteria for food.
 - B. Aquatic plants absorb cyanobacteria for nitrogen.
 - C. Aquatic plants depend on cyanobacteria to fix nitrogen gas.
 - D. Aquatic plants use the form of nitrogen made by cyanobacteria.

Fruit Fly Genetics

**ITEM SAMPLER.
MAY BE DUPLICATED.**

Go on to the next page. 

Biology students can use fruit flies in experiments. Fruit flies have short life cycles and easily observable traits. Genetics studies involving wing length and eye color are common.

5. Students observe fruit flies with different eye colors and wing lengths. Which type of molecule carries the instructions for characteristics in fruit flies?
- A. ATP
 - B. Glucose
 - C. Fatty acids
 - D. Nucleic acids

**ITEM SAMPLER.
MAY BE DUPLICATED.**

Go on to the next page.

Each somatic cell, or body cell, in a fruit fly has chromosomes that contain the genetic information needed for life.

6. Which statement best describes the composition of genetic material in fruit flies and other animals?
- A. Genes and chromosomes are composed of DNA.
 - B. Genes and chromosomes are composed of RNA.
 - C. Genes are composed of DNA; chromosomes are composed of RNA.
 - D. Genes are composed of RNA; chromosomes are composed of DNA.

**ITEM SAMPLER.
MAY BE DUPLICATED.**

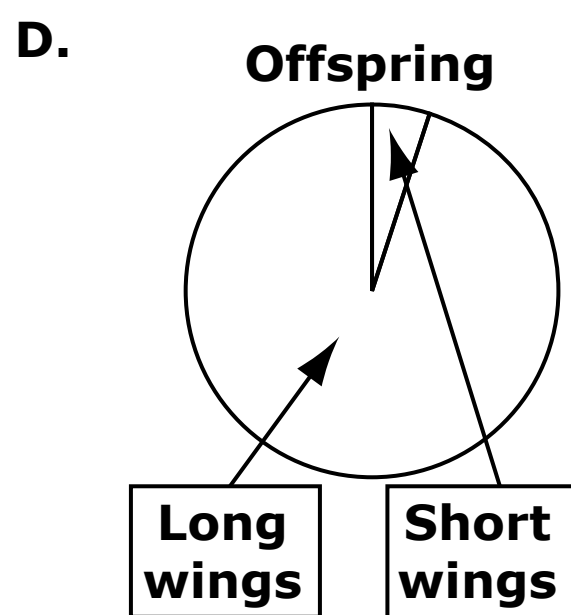

Go on to the next page.

Biology students examine wing length inheritance in fruit flies by doing a cross and observing the offspring. In biology, a cross is defined as 2 organisms bred to produce offspring.

Results of a Fruit Fly Cross

Cross		Offspring
 Long-winged fly	X	 Long-winged fly
		75% long wings 25% short wings

7. The students count the offspring from the cross and show the results in a circle graph. Which graph best represents the results of the cross?

**ITEM SAMPLER.
MAY BE DUPLICATED.**

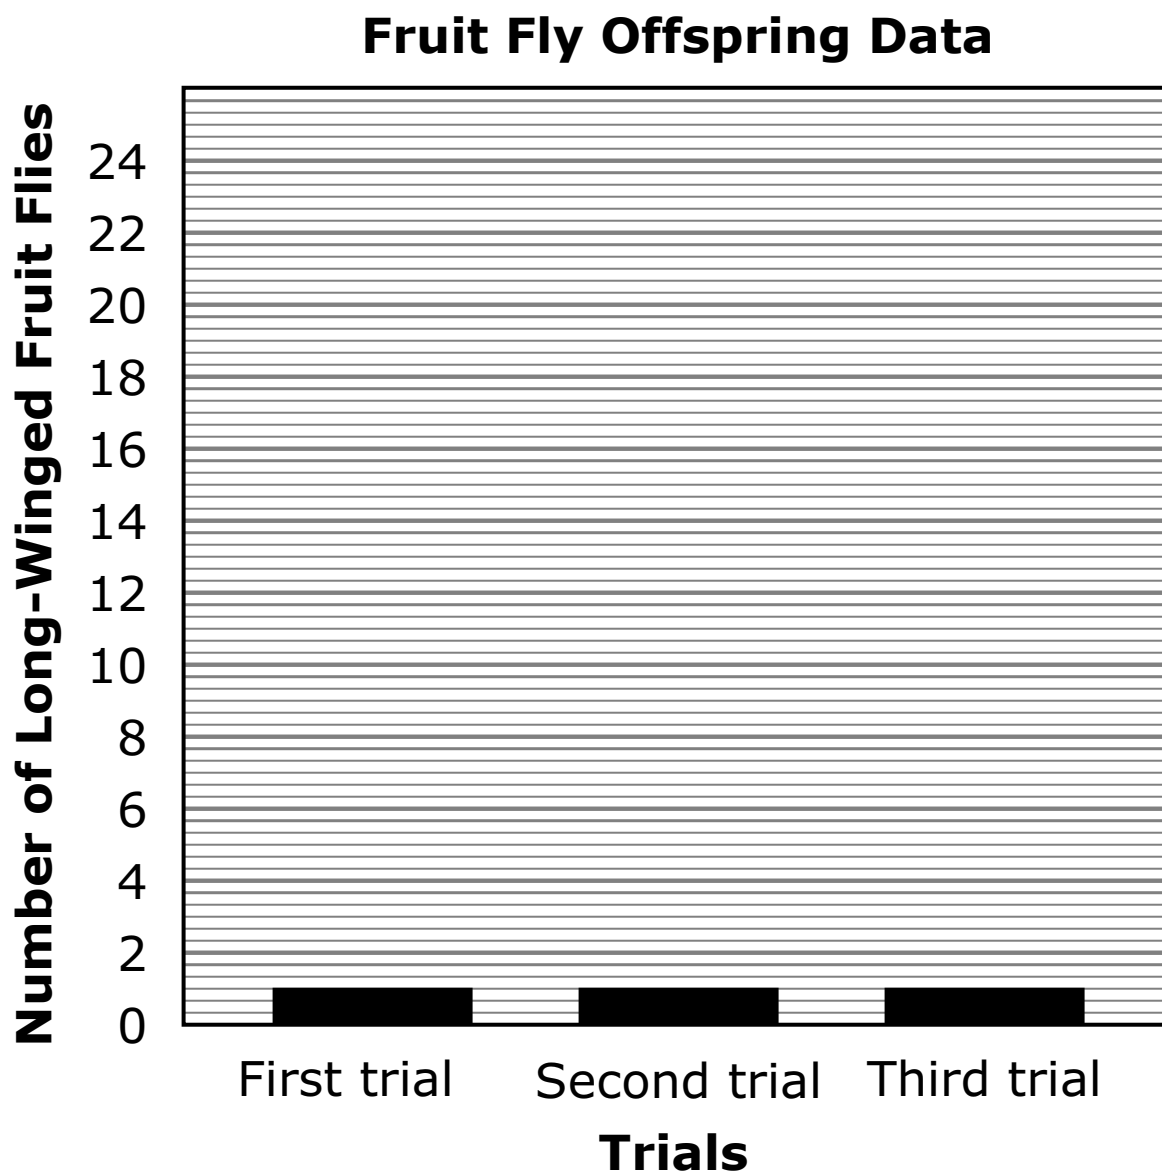

Go on to the next page.

8. The students perform 3 trials of the cross. In the first trial, the students count 8 offspring. In the second trial, the students count 16 offspring. In the third trial, the students count 24 offspring.

Calculate the number of long-winged fruit flies counted in each of the 3 trials. Make a graph of this data.

You can use the calculator to help you answer this question.

Write a "+" above each bar where the top of the bar should be.

**ITEM SAMPLER.
MAY BE DUPLICATED.**

Go on to the next page.

This is the end of Segment 1.

Segment 2

You will be told when to begin this segment.

Science Test – Segment 2

Altitude Training

2

ITEM SAMPLER.
MAY BE DUPLICATED.

Go on to the next page. 

When athletes train and compete, their cells require large amounts of energy. For cells to get the energy they need, many organ systems must work together.

2

**ITEM SAMPLER.
MAY BE DUPLICATED.**

Go on to the next page.

9. Write the letter of each activity in the diagram to show how organ systems work together to help the cells transform energy. The activities are labeled A, B, C, or D. You may use each letter 1 time.

Activities

A.	B.	C.	D.
Cells get raw materials	Circulatory system transports	Digestive system breaks down food	Respiratory system gets oxygen

**ITEM SAMPLER.
MAY BE DUPLICATED.**

Go on to the next page.

Some athletes train in locations that have high altitudes. Training in these locations may result in the body being able to get more oxygen to the muscles during exercise. More oxygen available to the muscles can help athletes perform better during competition.

2

**ITEM SAMPLER.
MAY BE DUPLICATED.**

Go on to the next page.

10. What is 1 way more oxygen helps athletes' muscle cells when they exercise? Athletes' muscle cells

- A.** require less food.
- B.** produce less waste.
- C.** use more carbon dioxide.
- D.** convert more glucose to energy.

**ITEM SAMPLER.
MAY BE DUPLICATED.**

Go on to the next page. 

To determine if athletes are benefiting from training in high altitudes, scientists measure the volume of oxygen that athletes use during exercise. This measurement is called VO_2 max. Athletes benefit when they increase their VO_2 max.

The graph shows the VO_2 max for 3 athletes who trained in high altitudes for 4 weeks.

**ITEM SAMPLER.
MAY BE DUPLICATED.**

Go on to the next page.

11. Identify the time period during which each athlete showed the greatest increase in VO_2 measurements.

The time periods for Athlete 1 are labeled A, B, C, or D. The time periods for Athlete 2 are labeled A, B, C, or D. The time periods for Athlete 3 are labeled A, B, C, or D. Write the letter of the correct time period in each empty box.

Greatest Increase in VO_2 Measurements

	Athlete 1	Athlete 2	Athlete 3
	<input type="text"/>	<input type="text"/>	<input type="text"/>
A.	Week 0-1	Week 0-1	Week 0-1
B.	Week 1-2	Week 1-2	Week 1-2
C.	Week 2-3	Week 2-3	Week 2-3
D.	Week 3-4	Week 3-4	Week 3-4

2

**ITEM SAMPLER.
MAY BE DUPLICATED.**

Go on to the next page. 

Athletes who increase their VO_2 max may also improve their performance during competition.

The table shows the race times for the 3 athletes before and after they trained in high altitudes.

Athletes' Race Times

	Before Training (min.:sec.)	After Training (min.:sec.)
Athlete 1	17:46	17:02
Athlete 2	16:58	16:32
Athlete 3	17:24	16:12
Average	17:23	16:35

2

**ITEM SAMPLER.
MAY BE DUPLICATED.**

Go on to the next page.

12. The graph shows the improvement in race times (min.:sec.) for each of the 3 athletes. Complete the graph by putting labels on the x-axis.

Each label is marked A, B, or C. Write the letter of the correct label in each empty box. You may use each letter 1 time.

**ITEM SAMPLER.
MAY BE DUPLICATED.**

Go on to the next page.

This is the end of Segment 2.
