Video Individual Student Reports (ISRs) FAQs

1. What are video ISRs?

Video ISRs are personalized video reports for students with MCA and MTAS scores. These videos include an overview of the assessment and the student's performance in each subject taken, as well as their performance related to the school, district, and state averages. Students without a score in at least one subject have no video report available.
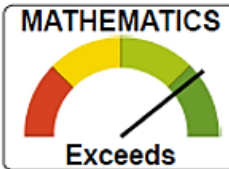

2. When are video ISRs available?

Video ISRs are available on the same day printed ISRs arrive in districts.

## 3. Who receives a video ISR?

Video ISRs are created for students with at least one valid score in the grade they tested for MCA and MTAS.

- Grades 3, 4, 6, and 7: Students need a valid score in reading and/or mathematics.
- Grades 5 and 8: Students need a valid score in reading, mathematics, and/or science.
- High school: Students need a valid score in the subject taken. If multiple subjects are completed in the same year, students receive separate video ISRs for each subject with a valid score.
- Students who complete assessments in multiple districts will have video ISRs created for each district. The video includes only the results from that district.
- Students who complete an MCA in one subject and MTAS assessment in another will have video ISRs created for each assessment. The video includes only the results from that assessment.
- Students with only non-valid scores (such as test or score codes like REF-S, REF-P, INV-S, INV-O, INV-D, ME, ABS, NA, NC, or NE) will not receive a video ISR.

Example 1: Single subject ISR with valid score and video ISR available.

Example 2: Multi-subject ISR with one valid score and two non-valid scores and video ISR available.

Example 3: Single subject ISR without a valid score and no video ISR available.

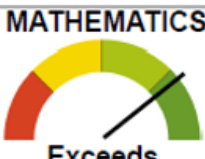

4. Are video ISRs available in other languages?

All students with MCA and MTAS scores are provided video ISRs in English. Any student with a 3-digit "home language" code specified in student enrollment data submitted to MDE that is also one of the 10 supported languages. The ISR will include a second QR code to access a video ISR in the specific home language: Amharic (063), Arabic (002), Chinese (007), Hmong (020), Karen (129), Oromo (074), Russian (040), Somali (069), Spanish (045), and Vietnamese (051). Note: The home language codes are available in *Appendix D - Home Primary Languages by Code* on the MARSS Reporting Instructions page under MARSS Manual.

Example 4: Single subject ISR with translated video ISR available.

Example 5: Two subject ISR with translated video ISR available.

5. How do I access the video ISR?

Parents/guardians can access video ISRs by scanning a QR code on the ISR with a smart device. If parents/guardians do not have access to a smart device, they can contact their student's school for a link to the video.

School staff with the District Assessment Coordinator (DAC) or Assessment Administrator (AA) user role in PearsonAccess Next have access to a spreadsheet containing hyperlinks of video ISRs for each student. This spreadsheet is posted by district and school and available in PearsonAccess Next under Published Reports.

6. How do I watch the video ISR?

Once the QR code is scanned (or hyperlink entered into a browser), the video ISR opens in a browser tab. Closed captioning is turned on by default and available along the top. Additional options are available under the three dot menu: download, playback speed, and picture in picture. The landing page also contains links for additional resources and information.

Example 6: English video ISR landing page.

Example 7: Video Player Options (Left to Right): Play button, Volume, Full screen, Three dot menu (Download, Playback speed, Picture in picture)

Example 8: Translated video ISR landing page with translated closed captioning
