

# Longitudinal Export

The Longitudinal Export allows users to download a file of historical test results for all students currently active in the district. This quick guide provides instructions on downloading and exporting results in PearsonAccess Next.

## Longitudinal Export

The Longitudinal Export includes all student results in a CSV format. The Longitudinal Export includes strand information. Only users with District Assessment Coordinator or Assessment Administrator roles have the permission to retrieve Longitudinal Export files from PearsonAccess Next.

1. From the Home page, under **Setup**, select **Import / Export Data**.
2. Select the dropdown menu next to the **Start** button and select **Import / Export Data**.
3. From the **Type** menu, select the appropriate **Longitudinal Export** (MCA Modified, MCA, MTAS, or OLPA)
4. Select **Process** to begin the download process.
5. When file is ready, select **Download File**.
