

Historical Student Data User Guide

This guide provides instructions on viewing historical MCA and MTAS student data in PearsonAccess Next.

Note: 2025 historical student data is not available in Historical Student Data Reports in PearsonAccess Next. Data from previous test administrations (2011–2019; 2021–2024) are still available under Historical Student Data.

Note: The individual student information available in the secure PearsonAccess Next system is private student data. Ensure student data privacy is maintained when accessing, printing, or sharing information from the system.

Overview

Access to Historical Student Data provides users two ways to view previous assessment history for an individual student based on the student's status:

- 1) Currently enrolled in the user's district.
- 2) Previously tested in the user's district.

Both paths include the following data:

- Test administration and year
- Where the student tested
- Grade
- Subject
- Scale score
- Achievement level

Additional test and performance details are available once an individual assessment record is selected.

Note: After the 2022 test administration, the Learning Locator code for MCA is no longer reported. While Learning Locator codes for previous years may be present, the code does not provide districts with resources as the Perspective website is no longer available.

Where and when Historical Student Data for an individual student is accessed in PearsonAccess Next depends on whether the student is currently enrolled in your district or has previously tested in your district. Data is available in both locations for students who are currently enrolled *and* previously tested in your district.

Access by User Role

Users with the District Assessment Administrator (DAC) or Assessment Administrator (AA) role in PearsonAccess Next have access to historical student data. If teachers (for example, users with the Test Monitor/Data Entry or MTAS/Alt MCA Test Administrator user role) need access to historical student data, the DAC or AA must first add these users to reporting groups (see table below).

Instructions for creating reporting groups in PearsonAccess Next are available in the [Reporting Groups User Guide](#) (PearsonAccess Next > Reporting Resources > Additional Reporting Resources).

Report Access by User Role

User Role	Historical Student Data is available
District Assessment Coordinator (DAC)	Yes
