

Science Alternate MCA

Student Readiness Tool

Phenomena Book

This book includes phenomena for Science Tasks 1–2. All items associated with these phenomena are located in the Presentation Pages and/or online.

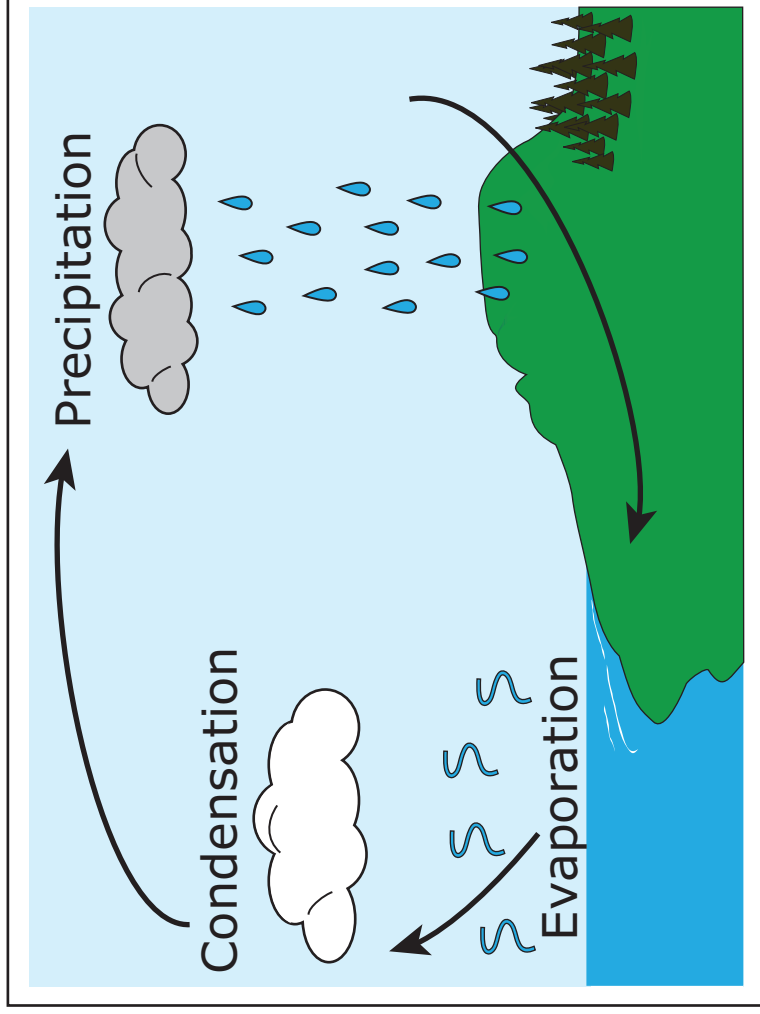

Both the Phenomena Book and the Presentation Pages associated with Tasks 1–2 should be visible to the student if testing with paper test materials. They are also available if deciding to use paper test materials to support a student testing online in a hybrid administration.

S5_1-3

Read the text and look at the pictures. Then, answer 3 questions.

A student saw clouds form over a lake. Later it rained on the land. The student made this picture of the water cycle.

Water Cycle

Read the text and look at the pictures. Then, answer 3 questions.

Students made some observations about objects in their classroom. Objects have properties that can help identify what they are. The picture shows some of the objects the students observed.
